

MAKING YOUR VISION A REALITY.

About Us

Dairy Specialists LLC is one of the largest and most innovative commercial dairy service and supply dealerships in the country. Dairy Specialists supplies commercial dairy farms with innovative parlor designs, new construction and remodels. Additionally, we offer state-of-the-art dairy equipment, parts and supplies because of strategic partnerships with a myriad of the world's best manufacturers and suppliers.

Dairy Specialists has been serving Colorado since 1970 and, from the beginning, has been a leader in new technologies that provide greater efficiency and sustainability in the dairy industry. Today, Dairy Specialists' sanitation personnel focuses in assisting dairymen in the design of cost effective sanitation programs to ensure the ongoing cleanliness of equipment as well as optimization of animal health and quality of milk product output. Dairy Specialists provides 24/7/365 service and maintenance to its dairy partners with a highly experienced group of technical specialists available for routine maintenance and emergency service.

Dairy Specialists also concentrates in dairy waste management, assisting dairy farmers with removal and recycling of waste as fertilizer and composting material. Dairy Specialists is a leading innovator in the dairy waste management effort; in 2007, we designed and installed the first Centrifuge waste management system in Colorado. Dairy Specialists was the first dairy equipment dealer to offer this new and emerging technology in the dairy waste market.

The first two robotic dairies in Colorado were built by us in 2018 including a fully automated 60 stall rotary dairy and a 24 Box robotic milking system continuing our leadership in innovation for Colorado dairies.

Division Highlight:

SERVICE & MAINTENANCE

Dairy Specialists provides technical support and service 24/7/365. We employ experienced service technicians with anywhere from 10-20 years of dairy equipment experience to take care of your service needs.

That's because we know the importance of continuous milking when you're raising an expendable, live investment. We understand how critical it is to have inventory and assistance available when needed.

Our goal as a service organization is to minimize or prevent downtime while maximizing productivity. Ongoing training and commitment to excellence ensure that our dedicated service team is prepared to meet the complex needs of our dairy partners.

Our service technicians are trained and certified in many areas including:

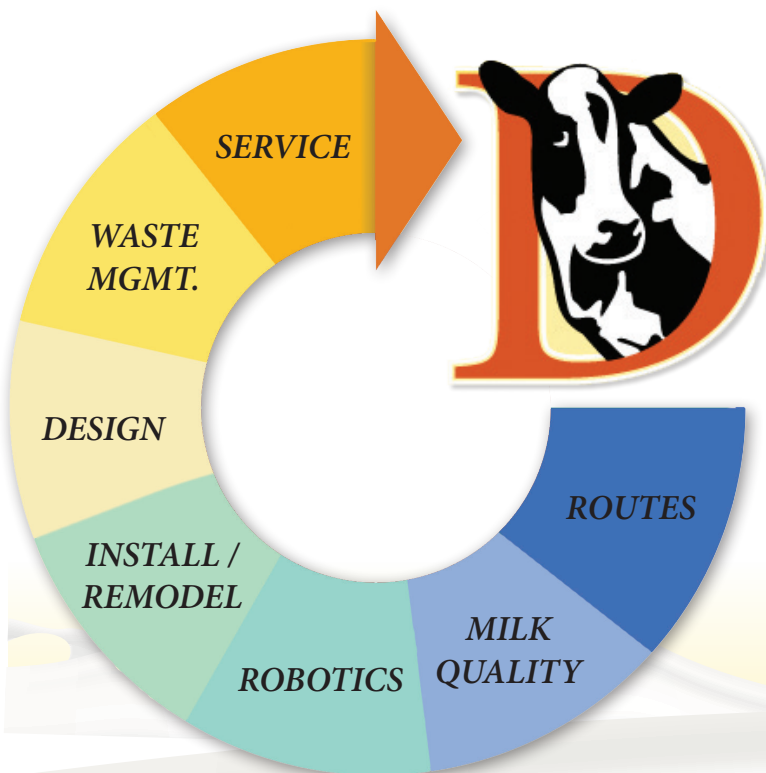

Dairy Equipment: GEA, Lely, Westfalia, Boumatic, Delaval

Air Systems: Quincy, Gardner Denver, Paletex, Hankinson

Robotics: GEA, Lely, Feed Systems

Manure Equipment: Centrisys Centrifuge, Loewen, Houle, Vaughan, Agpro

Cooling Equipment: Mueller, Boumatic, Delaval
